30 April 2019 (8.2.0)

SkavaSTORE B2C

Accessibility Standards

The SkavaSTORE website conforms to the following Web Content Accessibility Guidelines (WCAG) [SKB2B-3195]:

Guideline	Description
Section Headings	Section headings at the appropriate places have been incorporated which helps users to understand the overall organization of the page content more easily. For more information, see Section Headings – WUHCAG [https://www.wuhcag.com/section-headings/] and Section Headings – W3C [https://www.w3.org/TR/UNDERSTANDING-WCAG20/navigation-mechanisms-headings.html] .
Website	SkavaSTORE website has been structured logically. For more information,

Structure	see Info and Relationships [https://www.wuhcag.com/info-and-relationships/] .
Skip to Content Link	Helps users navigate to SkavaSTORE, provide a way for them to bypass parts of each page, such as long navigation links, links in the header and other repetitive content. For more information, see Skip to Content Link – WUHCAG [https://www.wuhcag.com/bypass-blocks/] and Skip to Content Link – W3C. [https://www.w3.org/TR/2016/NOTE-WCAG20-TECHS-20161007/G1]
Focus Visible	Enables users to move around within SkavaSTORE using a keyboard. For more information, see: Ensuring keyboard focus is visible and clear [https://www.wuhcag.com/focus-visible/] and Keyboard accessibility [http://www.wuhcag.com/keyboard/] .
Resize Text	Enables users to resize text up to 200% without loss of content or function. For more information, see Resize Text – WUHCAG [https://www.wuhcag.com/resize-text/] .
Consistent Navigation	Ensures consistent navigation, which helps users to move around websites. For more information, see Consistent Navigation [https://www.wuhcag.com/consistent-navigation/] and Keyboard [https://www.wuhcag.com/keyboard/] .
Keyboard	Enables users to access all parts of SkavaSTORE by keyboard only. For more information, see Accessing a website by keyboard only [https://www.wuhcag.com/keyboard-no-exception/] and No Keyboard Trap [https://www.wuhcag.com/no-keyboard-trap/] .
Use of Color	Instructions in SkavaSTORE does not rely solely on color alone. For more information, see Use of Color [https://www.wuhcag.com/use-of-colour/] and Understanding Success Criterion 1.4.1 [https://www.w3.org/TR/UNDERSTANDING-WCAG20/visual-audio-contrast-without-color.html] .
Audio Control	Pausing or stopping audio is available to control audio volume in case if any audio on the SkavaSTORE webpage plays automatically. For more information, see Audio Control [https://www.w3.org/TR/WCAG20/#visual-audio-contrast-visual-presentation] .
Contrast	Adhered to the contrast ratio for visual presentation of text and images of text. For more information, see Contrast (minimum) [https://www.w3.org/TR/WCAG20/#visual-audio-contrast7] and Contrast (enhanced) [https://www.w3.org/TR/WCAG20/#visual-audio-contrast-enhanced] .
Consistent Identification	Adhered to the consistent use of icons and buttons in the SkavaSTORE storefront. For more information, see Consistent Identification [https://www.wuhcag.com/consistent-identification/] .
Pause, Stop,	Provided user controls for moving content. For more information, see

Hide	Pause, Stop, Hide [https://www.wuhcag.com/pause-stop-hide/] .
Timing Adjustable	Provided user controls for the time limits. For more information, see Timing Adjustable [https://www.wuhcag.com/timing-adjustable/] .
Link Purpose (In Context)	All hyperlinks in SkavaSTORE are clear and easy to understand. For more information, see Link Purpose (In Context) [https://www.wuhcag.com/link-purpose-in-context/] and Link Purpose (Link Only) [https://www.wuhcag.com/link-purpose-link-only/] .
Labels or Instructions	Provided appropriate labels and instructions. For more information, see Labels or Instructions [https://www.wuhcag.com/labels-or-instructions/] .
Non-text Content	Provided text alternatives for non-text content. For more information, see Non-text Content [https://www.wuhcag.com/non-text-content/] .
Headings and Labels	Provided clear headings and labels. For more information, see Headings and Labels [https://www.wuhcag.com/headings-and-labels/] .
Alt Text	Provided alt attributes for images. For more information, see Using ALT Text Properly [https://a11yproject.com/posts/alt-text/] .
Images of Text (No Exception)	Avoided using images of text in SkavaSTORE For more information, see Images of Text (No Exception) [http://www.wuhcag.com/images-of-text-no-exception/] .
Cursor	The cursor property in CSS controls what the mouse cursor will look like when it is located over the element in which this property is set. For more information, see Cursor Property in CSS [https://css-tricks.com/almanac/properties/c/cursor/] .

Browser Compatibility

Extended browser compatibility as follows [SKB2B-4206]:

- Google Chrome (1 earlier and higher versions)
- Firefox (1 earlier and higher versions)
- Internet Explorer Edge (1 earlier and higher versions)
- Android versions 8 and 9.
- IOS (1 earlier and higher versions)

Cart – Inactive Item(s)

Ability to view the appropriate error messages when there is an inactive item(s) in the mini cart and cart. [SKB2B-3207]

The error message will be displayed in the following scenarios:

Scenario 1: When an inactive item(s) exists in the mini cart or cart, page navigates to PDP by clicking the image.

Scenario 2: When the Product is no longer available in the Inventory, PDP navigation is disabled.

Cart Merge

Ability to view the merged items of the guest user and registered user in the cart, when a guest user registers/signs in. [SKB2B-3206]

Checkout

Ability to provide a name on the card in the payment section of Checkout. [SKB2B-4116]

Domain Mapping

Ability to map a domain with its dynamic store ID. [SKB2B-4513]

Favorites/Save for Later

A guest user can perform the following actions [SKB2B-3867, SKB2B-3901]:

- Add a product as favorite in the PLP, PDP, Recently Viewed Items, What's New, Most Popular, Sale Recommend Products, and Related Products. On adding an item as favorite, the favorite icon will be changed from black to red.
- View all the product(s) that have been marked as a favorite in the Favorites page, which is available in the header section. The item will be removed from the Favorites page when clicking on the favorite icon again. If there are no favorite items, the message "You do not have any favorites items yet." is displayed in the Favorites page.
- View the total count of the products that have been marked as favorites in the header section. The favorite icon in the header changes to red if there are favorite items. Otherwise, the icon is displayed in black.
- Navigate to PDP on clicking on a product from the Favorites page.
- View the product details like name, description, SKU, original price and revised price, review rating, the total number of reviews.
- On hovering, display the product facets like color, size, fit where a user can select the values from the drop-down list.
- On hovering, the "Add To Cart" button and "Move To List" will be shown where a user can add the product to the cart, move the product to the list, or create a list and then move the product to the list. On moving, the user is prompted to sign in.
- Ability to save a particular item by clicking the "Save For Later" button and move the saved item to Cart by clicking the "Move To Cart" in the mini cart page.

Google Analytics Implementation

Added feature to collect user-interaction data like Page View, Add to Cart, Remove from Cart, Checkout etc. using Google Tag Manager and Google Analytics. [SKB2B-

4205]

List Merge

Ability to view the merged items of the guest user and registered user in the list (Save for Later and Favorites), when a guest user registers/signs in. [SKB2B-3206]

Order Search

The following enhancements pertaining to the search have been implemented in Order History [SKB2B-3858]:

- Ability to search all orders or a particular order ID.
- Ability to search and view order details for the selected period (such as All, Last 3 months, Last 6 months, or Last 1 year).
- Ability to search order by status (such as Submitted, Ready to edit, Freeze edit, Submitted to fulfillment, Ready to ship, Unable to ship, Shipped, Return submitted, Canceled, or Delivered). The order status is configured in the OMS service.

Order Search Result

The following enhancements pertaining to the search result have been implemented in Order History [SKB2B-3858]:

- The latest submitted orders will be displayed with the latest order on top of the result.
- On the top of each order, the following product details will be shown: Order #, Order placed date, and status of the order.
- On clicking the Order Details (for desktop) or Details (for mobile or tab), a registered user can view shipping address, shipping method, payment method, order summary details, option to print the order details, and option to order the same set of products again.
- The following product details will be shown for each item: Product image, short description, Size, Color, Item #, Quantity ordered, price (sale price and original price), option to order the item again, and option to write a review (At present, this option is static) on the product.
- When there are no orders retrieved, then the message “Sorry, no matches found. Please make sure you entered your information correctly that was sent to your confirmation mail.” is displayed.

Partial Return/Cancel

Ability to partially return and cancel an item within an order from Order history page. [SKB2B-3905]

PLP Authoring via Merchandising Template

A Merchandiser Admin can perform the following actions in PLP template [SKB2B-3794]:

- Ability to reorder and maintain the products and filter attributes within the PLP template.
- Ability to automatically adjust the positions of the products and filter attributes in the PLP template when there is an addition or deletion of the product.
- Ability to see the alternative images of the products and set their orders.
- Ability to change the image frame size of the product.
- Ability to hide/unhide the filter attributes.

Upsell/Cross Sell

Ability to view the upsell and cross sell products in the home page as Recommended Product and view related products in PDP. [SKB2B-2042]

SkavaSTUDIO Changes for SkavaSTORE

The following widgets/components have been newly implemented in SkavaSTUDIO where an author can configure the properties to render them appropriately in Storefront:

- Media Carousel widget has been implemented with properties such as desktopColSpan, tabletColSpan, mobileColSpan, hasBullets, and hasArrows. [SKB2B-3256]
- Ability to load the authored pages in an iframe inside of SkavaSTUDIO to preview instantly. [SKB2B-3962]
- Ability to preview image and text while authoring the page using a widget. [SKB2B-3929]

02 January 2019 (8.0.0)

SkavaSTORE B2B

Buyer Self-Onboard

The following features have been implemented as part of the signing up to the B2B storefront. A Buyer Administrator has the ability to:

- Access the B2B storefront with a valid URL, reset the password, and click on Sign Up to create an account.
- Provide the personal details and the organization details in the onboard form, such as:
 - Personal details like First Name, Last Name, e-mail address

- Organization details like Organization name, Street Address, City, State/Province, Country/Region, Zip code, Phone Number, Tax ID, and DUNS.

On filling all the necessary details, the message “Thank you for registering, a confirmation message will be sent shortly post approval” is displayed.

- Sign in to the B2B storefront to update the profile, browse and place orders, manage the users, approve or reject the order(s) that are raised by the users, etc.

The following features have been implemented as part of the signing up to the B2B storefront by a buyer user:

- A buyer user can sign up based on the email notification received from the buyer administrator.
- On hitting the URL from the registered email ID, the buyer user can set the new password. On successful, the user will be navigated to the Sign In page where the user can sign in to the B2B storefront after providing valid credentials.

Sign In

The following features have been implemented in the Sign In page where a registered buyer user or buyer administrator can perform the following actions:

- Option to sign in to SkavaSTORE with valid credentials, such as email address and password has been implemented. If required, a user can enable the password icon to view the hidden password.
- A registered user can reset their password by clicking on the “Forgot Password?” link in the “Sign In” page.
- The following validation messages are shown if the entered value is incorrect:
 - Name: Please enter your first name.
 - Last Name: Please enter your last name.
 - Phone: Please enter a valid phone number.
 - Email Address: Please enter a valid email address.
- On successfully signing in, the following pages will be shown:
 - For a buyer administrator, the Dashboard Overview page is displayed.
 - For a buyer user, the My Profile page is displayed.

Resetting the Password

A registered buyer administrator or buyer user can reset their password by clicking on the “Forgot Password?” link in the “Sign In” page. On clicking the Reset Password button, the user can choose to reset the password through an email.

On clicking the “Send Reset Link” button, the user will receive an email with a link for resetting the password. On clicking the link, the user will be navigated to the Reset Your Password page where the user can reset the password by providing a new password and re-enter the same password again.

Editing User Information

A buyer user or buyer administrator can view and/or edit their profile information under the Account > My Profile page.

Note: All the functionalities in the My Profile page are similar to the business-to-customer (B2C) storefront’s Account Overview functionalities.

Inviting Users

The following features have been implemented where a buyer administrator can perform the following actions:

- Navigate to the “Account” page, where the administrator can view the Dashboard Overview. Option to invite users has been available under the section “Invite Users to Join”. On clicking the “Invite Users” button, the User Management page will be displayed.
- Invite a buyer user by providing a valid email address, associating the user to a team, assigning an appropriate role, and then clicking the “Send Invite” button. The buyer user will receive the invitation to the email address with a link to register and access the account.
- Alternatively, a buyer user can be invited by navigating to Account > User Management page.
- Option to add/remove one or more users has been provided in the User Management page. At a time, a maximum of 10 users can be added.

Managing Payment Cards

A registered buyer user can view the existing payment cards, add a new card, and/or remove an existing card in the Account > Payment Methods page. The user can set a particular payment card as default by selecting the “Default Payment Method” option.

Note: All the functionalities in the Payment Methods page are similar to the B2C storefront’s Payment Methods functionalities.

Managing Shipping Address

A registered buyer user can view all addresses, add a new address, edit the existing address, and/or remove a particular address in the Account > Address Book page. A particular address can be set as the default address.

Note: All the functionalities in the Shipping Address page are similar to the B2C storefront’s Shipping Address functionalities.

Product List Page

The following features have been implemented in the Product List page where a buyer administrator or buyer user has the ability to perform the following actions:

- Browse all the products as a buyer user or buyer administrator, which is specific to their account.
- Refine the products based on filter facets (for example, Brand, Size, etc.) are available in the left pane. Based on the refinement, products will be displayed and the user can click on the specified product for a detailed description.
- Sort the products by price from low to high and high to low are available for each filter (such as Brand, Size, Color, and Price). Based on the refinement, products will be displayed and the user can click on the specified product for a detailed description.

Note: All the functionalities in the Product List Page are similar to the B2C storefront's Product List Page functionalities.

Product Detail Page

The following features have been implemented in the Product Detail page where a buyer administrator or buyer user has the ability to perform the following actions:

- View the complete product details like name, description, SKU, price, etc.
- Add the product to cart as a buyer administrator or buyer user.

Note: All the functionalities in the Product Detail Page are similar to the B2C storefront's Product Detail Page functionalities.

Cart & Checkout Page

The following features have been implemented in the Cart and Checkout page where a buyer administrator or buyer user has the ability to perform the following actions:

- View the list of products added to the cart.
- Increase or decrease the product quantity in the cart.
- Choose the required Cost Center in the Cart page
- Delete a particular product from the cart.
- Confirm the orders to proceed to checkout.
- Enter the shipping address and choose the shipping method.
- Choose between different payment methods, such as credit card and purchase order. On selecting the purchase order, an option to enter the PO number by the user will be displayed.
- Review and submit the order.

Note: All the other functionalities are similar to the B2C storefront's functionalities, except Promo code and gift card as these are not applicable for B2B.

Order Confirmation Page

The following features have been implemented in the Order Confirmation page where a buyer user or buyer admin can perform the following actions:

- Browse and add products and place the order successfully.
- Perform a successful check out by providing all the necessary information
- View the order confirmation page on successful placement of an order.
 - For buyer user: View the Order # with a description “Your order has been placed. Order will be processed post approval.”
 - For buyer administrator: View the Order # with a description “Your order has been placed. You will receive a confirmation email shortly.”

To view the order history, click the link “View order details”. To continue your shopping, click the “Continue Shopping” button, which takes the user to the home page.

- Once the buyer user has placed the order, the order will be processed post approval by the buyer administrator.
- If an order has not been placed successfully, an order failure message is displayed.

SkavaSTORE B2C

Localization

The following features have been implemented in the header section where a registered or guest user has the ability to perform the following actions:

- Choose the locale (US English (default), Canada English, or Canada French) from the header section.
- Search a product by a product name depending upon the chosen locale.
- View the product/SKU and currency in the product list page and product detailed page depending upon the chosen local.
- Ability to display currency in the cart page depending upon the chosen locale.

Promotion on a Product

The following features have been implemented in the PLP, PDP, Cart, and Checkout Pages where a Skava reference store user has the ability to perform the following actions:

- View the default promotions on a product in the PLP, PDP, mini-cart, cart pages.
- View description in the PLP and PDP on clicking the promotion title link.
- Apply promo codes in the Checkout page for each item.
- Add up to 4 promo codes under the Payment Method while checking out. If the entered code is incorrect, an invalid error message is displayed.

- Delete a promo code under the Payment Method while checking out.
- Enter and apply a coupon code under Payment Method in the checkout process.

Item Level Shipping

The following features have been implemented where a registered user can perform the following actions:

- Ability to change the address by selecting one of the existing saved address or adding a new address in the Shipping Address section while performing the checkout operation.
- Ability to ship products to multiple shipping addresses by clicking on “Ship To Multiple Addresses”. This option is available in the shipping section while performing the checkout. The “Ship To Multiple Addresses” option is visible when more than one item is present in the cart.
- Ability to ship products to a single address by clicking on “Ship To Single Address”. This option is available by default when there is only one item while performing the checkout.
- Ability to view the default address in the shipping address section until “Ship To Multiple Addresses” is clicked.
- Ability to display the saved address (Account > Address Book) and option to add a new address is available:
 - under each item, if the selected option is “Ship To Multiple Addresses”. Also, an option to enter a new address is available.
 - if the selected option is “Ship To Single Address”.
- Ability to select a particular saved address, if there are more than one address is available under the “Saved Addresses” option.
- Ability to enter a new address is available on clicking the “Add New Address” option.
- Ability to display in the float format, if there are more than three addresses are available.

The following features have been implemented where a guest user can perform the following actions:

- Ability to add new address by default along with an option to select “Ship To Multiple Addresses” or “Ship To Single Address” has been provided after clicking the “Guest Checkout” button.

Favorites Page/Icon

The favorite feature (previously, the Save feature) has been implemented as follows where a registered user can perform the following actions:

- Add a product as favorite in the PLP, PDP, Recently Viewed Items, What’s New, Most Popular, Sale Recommend Products, Related Products. On adding an item as favorite, the favorite icon will be changed from black to red.

- View all the product(s) that have been marked as a favorite in the Favorites page, which is available in the header section. The item will be removed from the Favorites page when clicking on the favorite icon again. If there are no favorite items, the message “You do not have any favorites items yet.” is displayed in the Favorites page.
- View the total count of the products that have been marked as favorites in the header section. The favorite icon in the header changes to red if there are favorite items. Otherwise, the icon is displayed in black.
- Navigate to PDP on clicking on a product from the Favorites page.
- View the product details like name, description, SKU, original price and revised price, review rating, the total number of reviews.
- On hovering, display the product facets like color, size, fit where a user can select the values from the dropdown list.
- On hovering, the “Add To Cart” button and “Move To List” will be shown where a user can add the product to the cart, move the product to the list, or create a list and then move the product to the list.
- Share the favorite product(s) via social networking sites like Facebook, Twitter, etc. (static in this release).

When a guest user clicks on the favorite icon, a sign in page is displayed prompting the user to log in or create an account to save the product to the Favorites page.

Adding a Product to the List

The following features have been implemented in the Lists page under the Account section where a registered user has the ability to perform the following actions:

- Add a product to the existing list from the product detailed page or Favorites page. Once associated, the particular list is highlighted with a gray background.
- Create a list by clicking on the “Create List” button from the product detailed page or Favorites page where an option to enter a list name appears.
- In the Lists page (under the Account section):
 - View all the lists
 - View a particular list details which can contain one or more product(s), total product count, product information like, title, facets (such as Size and Color), quantity, original price and revised price, option to add the product to the cart, remove a product from the list, and move the product to another list category or option to create a new list.
 - Move the items from one list to another list.
 - The message “You have added this item to <Wishlist Name>” appears whenever an item is added to the list.
 - The message “There are no items within this list.” is displayed, if there are no items in the list.

- Delete a particular list from the Lists. A confirmation message “Delete List?” with Yes and Cancel option is displayed.
- Search the required lists with the exact list name as a search term in the search section.
- Share the list via social networking sites like Facebook, Twitter, etc. (static in this release).
- Enable the list to be visible only to the user by default (at present, only the Private option is available).
- The message “You do not have any list yet” is displayed on the Lists page, if there is no list has been created.

Privacy Settings

The “Privacy Settings” page has been newly implemented under “Account” where a registered user during registration has the ability to perform the following actions:

- Enable to receive weekly emails (static implementation) with new sales and special offers. By default, this option is disabled.
- Enable to receive sale notifications via SMS (static implementation). By default, this option is disabled.
- Provide consent for collecting and processing personal information. By default, this setting is enabled. If this setting is turned off, then the cookie information will be cleared.
- Export the order details and personal information (including preferences and personal information) to the local machine in the ZIP format file (first name and last name with timestamp) containing `OrderDetails.csv` and `ProfileDetails.csv` files.
- Freeze the account, if enabled. Once frozen, the user will be automatically logged out and will NOT be able to log in again. Only a CSR can unfreeze the account.
- Delete the account, if enabled. Once enabled, a confirmation message appears with “Yes” and “No” buttons. The account will be deleted and cannot be retrieved again when clicking “Yes”. However, the account details will still be available in the database.

For a guest user, the consent message is shown after launching the site requesting the user to accept the cookies. The user can view the home page only after closing the consent pop-up window.

Search & Suggestions

The following search features have been implemented where a user can perform the following actions:

- Ability to search for any product, SKU, or Category keywords.

- Ability to display typeahead suggestions based on the entered keyword, which helps the user to choose the appropriate search term. A minimum of three characters should be entered to display the typeahead suggestions.
- Ability to display up to recent searches on entering a search term.
- Ability to clear all the recent search terms or a particular recent search term.

Delivery Instructions

A registered or guest user has the ability to select and add delivery instructions for a particular shipping item or all shipping items in the Shipping section within the checkout page.

Recently Viewed Items

The following features have been implemented in the home page where a registered user has the ability to perform the following actions:

- View the recently viewed items in a descending order showing last four viewed products from the product detail page.
- View the product details like name, description, SKU, price, review rating, etc.
- Navigate to the product detail page on clicking on the product.
- Mark the product as a favorite by selecting the Favorite icon available on the top-right of each item.
- Select the various facets of the product.
- Add the product to the cart by clicking on the “Add to Cart” button.

The “Recently Viewed Items” section will NOT appear for the first time user or if the user has cleared the cookies.

Cart Page

A registered user can save a particular item by clicking on the “Save for Later” button in the mini cart page. The user can view the estimated shipping value in the cart page.

Up-Sell and Cross-Sell Products

The up-sell products (Recommended Products) and cross-sell products (Related Products) are displayed in the PDP.

Estimate Shipping Cost

A user can verify the estimated amount for the shipping location by entering the zip code and clicking on “Calculate” in the Estimate Shipping section in the mini cart. The estimated shipping amount can be viewed in the checkout page.

Payment Methods/Billing Address

The following features have been implemented in the Payment Methods page, which is under the “Account” page where a registered user can perform the following functions:

- Add billing address if you have opted for shipping products to multiple addresses in the checkout process. If a user has opted for shipping the products to a single address, then the user can choose to have a billing address and shipping address as same. When this option is not selected, address form fields appear to add the billing address.
- Choose to opt whether billing address should be same as shipping address. This option is available in the Payment Methods page under the Account section.
- Edit the billing address on clicking the Edit Information option of the billing address.
- Remove the billing address.
- Set a particular payment method to default.

SkavaSTUDIO Changes for SkavaSTORE

The following widgets/components have been newly implemented in SkavaSTUDIO where an author can configure the properties to render them appropriately in Storefront:

Component/Widget Name	Configure Property in Studio	Description
TextComponent	Widget Properties: <ul style="list-style-type: none">• <code>text</code>• <code>backgroundColor</code>• <code>textColor</code>	It is used to display content.
