

Admin User Guide – Pricing

□ Getting Started

[Accessing the Pricing Console \[#Access\]](#)

Overview

The **Pricing** microservice (“Pricing”) allows a Pricing Admin to create and manage multiple price lists, with each price list having its own currency and its own individual optional price types.

The Pricing is independent of the Catalog microservice, enabling a client to use Skava’s Catalog microservice or an alternative third-party catalog service of their choice. Skava’s Pricing microservice provides pricing for stock-keeping units (“SKUs”), each of which can have a default price (evergreen price) as well as pricing based on quantity and/or a schedule. Pricing Admins can easily import pricing data into the Pricing service using a very simple spreadsheet import template.

As with all microservices in the Skava Commerce solution, individual price lists are associated with a store managed by the Store microservice. Stores often serve multiple regions and store association permits the Pricing Admin to define a price list for each region.

Note: To preserve data integrity, the Store association only allows the Pricing Admin to choose price lists within the same collection.

For a detailed overview of the **Pricing** microservice, see the [Pricing Microservice Overview \[https://developer.skava.com/microservices/pricing/\]](https://developer.skava.com/microservices/pricing/).

Service Glossary

- **Bundle** – related products grouped so that they can be presented and sold together on the Storefront. Generally, bundles require the consumer or buyer to purchase the entire bundle. See the [Catalog Admin User Guide \[https://developer.skava.com/microservices/catalog/catalog-admin-user-guide/\]](https://developer.skava.com/microservices/catalog/catalog-admin-user-guide/) for more information about **bundles**.
- **Bundle Price** – the price of the SKU that is applicable only when the SKU belongs to a bundle product. This cannot be less than the floor price of the SKU. This is an optional price.
- **Business** – the parent of a **store** or set of **stores**. The basic use of a **business** is to manage common sets of users, catalogs, and other services for

the **stores** associated with the business.

- **Business Admin** – a role that manages business settings, creates and manages stores, and enables microservice(s) for a **business**.
- **Catalog** – a combination of products and **stock keeping units** (SKUs) organized to enable merchants to easily create, enrich, and manage product information for effective and efficient omni-channel commerce.
- **Collection** – a container or wrapper entity to hold **pricelists**.
- **Fixed Bundle** – bundle price remains static, irrespective of SKU variants.
- **Floor Price** – an optional price type that the **Pricing Editor/Admin** can set for a **stock keeping unit** (SKU) to trigger business logic in the event that promotions have driven the SKU's transaction price below an acceptable level for the **business**. For example, if the transaction price of a SKU falls below the **floor price** set by the **Pricing Editor/Admin** after multiple promotions are applied, business logic will cancel the transaction and message the consumer appropriately on the Storefront (also known as the Orchestration layer).
- **Mandatory Price Types** – the basic mandatory price types for a **stock keeping unit** (SKU), which includes Transaction Price.
- **Omni-channel** – a multichannel approach to sales that seeks to provide consumers with a seamless shopping experience, whether shopping online (on a desktop, a mobile, or tablet device), by telephone, or in person at a physical store (<https://searchcio.techtarget.com/definition/omnichannel> [<https://searchcio.techtarget.com/definition/omnichannel>]).
- **Optional Price Types** – optional price types available, beyond the **mandatory price types**, for a **stock keeping unit** (SKU), which could include Regular Price, List Price, Original Price, MSRP (Manufacturer's Suggested Retail Price), etc. There is no limit on the number of optional price types that can be added by the **Pricing Editor/Admin** and any of the optional types can be set as **required** to ensure data is entered for the **price type**.
- **Price** – a single instance of price for a **stock keeping unit** (SKU). A SKU can have multiple prices based on different tiers (quantity) and schedules.
- **Price Lists** – a container or wrapper entity to hold the prices of multiple **stock keeping units** (SKUs) available for sale to a consumer or buyer.
- **Price Types or Facets** – refers to the mandatory and optional price types available for a **stock keeping unit** (SKU).
- **Pricing Editor** (or **Admin**) – adds or updates pricing data for **stock keeping units** (SKUs) to an existing **price list** and submits the changes to a **Pricing Admin** for approval.
- **Pricing Admin** – creates and edits price lists, approves and denies data submitted by **Pricing Editors**, and Manages currency and price types used by a **price list**.
- **Product** – a good, service, or idea that has a combination of tangible and intangible attributes and can have multiple variants which are referred to as **stock keeping units** (SKUs). In Skava Commerce, the consumer or buyer evaluates a product (for example, a men's dress shoe available in black and brown and in sizes from 10 to 15), but actually purchases a SKU associated with the product (for example, a black colored version of the dress shoe in size 12) rather than the product itself.

- **Project** – a container or wrapper entity to hold changes made to a **price list**. New and updated pricing should pass through the Project approval workflow process before it is reflected in the store's **price list**.
- **Project Notes** – comments entered by project editor or approver to add context to project actions.
- **Project Workflows** – make business processes more efficient by managing and tracking the human tasks involved with a process and then providing a record of that process when it completes.
- **Quantity-Based/Tiered Pricing** – defines prices per unit within a range of quantities for a **stock keeping unit** (SKU). For example, a **Pricing Admin** could approve three tiers of pricing for a particular SKU based on the number of items purchased:
 - If a consumer buys 1 to 100 of the SKU, the **Transaction Price** per SKU will be \$100.
 - If a consumer buys 101 to 200 of the SKU, the **Transaction Price** per SKU will be \$80.
 - If a consumer buys 201 to 300 of the SKU, the **Transaction Price** per SKU will be \$60.

The **Pricing Admin** can add many prices with different tiers as well as many prices with different tiers for different schedules.

Note: The **Pricing Admin** will not be able to add prices with a maximum quantity less than its minimum quantity.

The Pricing Admin cannot create prices with overlapping tiers for the same SKU.

- **Scheduled Pricing** – defines prices for a **stock keeping unit** (SKU) within a specified time range. For example, a **Pricing Admin** could schedule four prices for a particular SKU at specified dates and times:
 - If a consumer buys the SKU from Jan 1, 2019 12:00:00 to Dec 31, 2019 12:00:00, the **Transaction Price** will be \$100.
 - If a consumer buys the SKU from Jan 1, 2020 12:00:00 to Jan 31, 2020 12:00:00, the **Transaction Price** will be \$60.
 - If a consumer buys the SKU from Jan 1, 2019 12:00:00 to Aug 31, 2019 12:00:00, the **Transaction Price** will be \$80.
 - If a consumer buys the SKU from Jan 13, 2019 12:00:00 to Jan 31, 2019 12:00:00, the **Transaction Price** will be \$60.

Overlapping schedules are allowed. When multiple prices apply for a SKU due to overlapping schedules, the Price will be returned based on the schedule bucket that has recently started (in the above example, the Price for the SKU on Jan 15, 2019 at 12:00:00 would be \$60, not \$80).

Note: Scheduled pricing may include **quantity-based/tiered** pricing.

- **SKU Kits** – a bundle that is specific to a SKU rather than a **product** which is available for purchase by a consumer or buyer.
- **Stock Keeping Unit** (SKU) – a particular variant of a **product** which is available for purchase by a consumer or buyer.
- **Store** – represents a specific physical location or online store of a **business**.

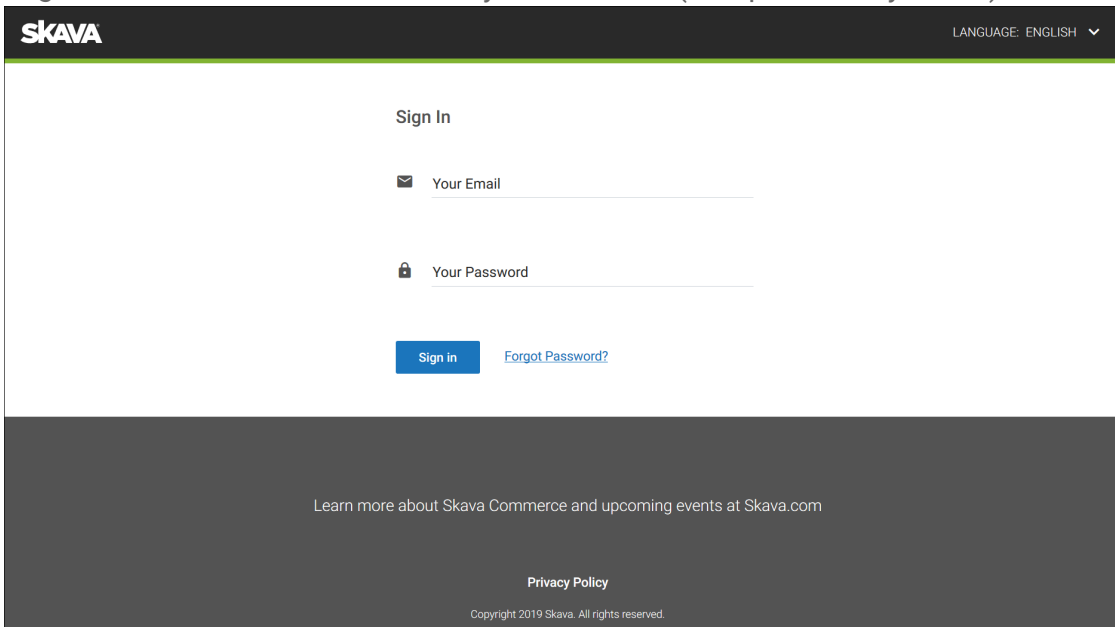

- **Store Admin** – associates a **pricelist** for each currency supported by a **store**.
- **Storefront** – a consumer-facing website that presents products, content, and promotions across multiple channels such as desktop, tablet, and mobile.
- **Subscription Percentage** – a discount in a percentage that is offered if a consumer or buyer chooses to start a subscription of a particular **stock keeping unit** (SKU). This is an optional price for a SKU
- **Transaction Price** – the price that a SKU will be sold for (excluding any price promotions that may apply). This is a mandatory price for SKUs
- **Variable Price** – only a minimum and maximum price are defined for a **stock keeping unit** (SKU). In this scenario, a consumer or buyer selects the purchase price for the SKU within a pre-defined price range set by the **Pricing Editor/Admin**. For example, a consumer or buyer decides to purchase a gift card in the amount of \$93, which falls within the \$10 minimum and \$500 maximum range defined by the **Pricing Editor/Admin**.

□ Accessing the Pricing Console

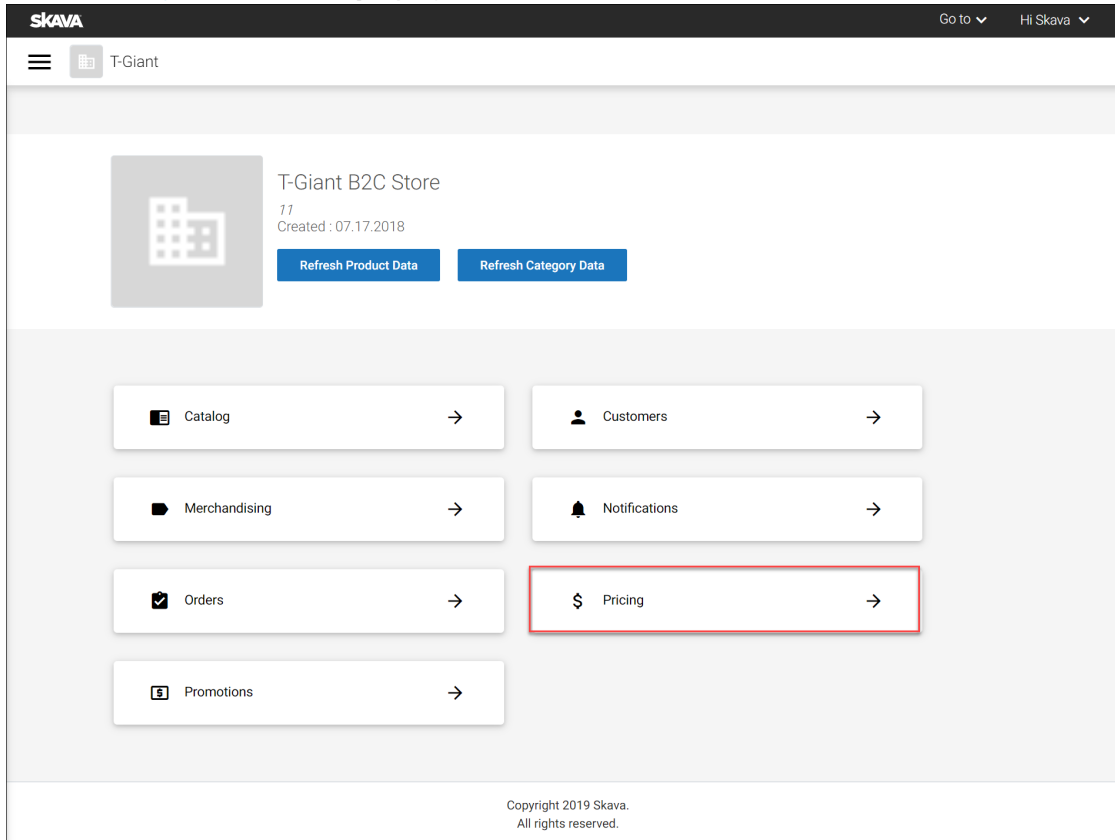

[Getting Started](#) [[#GetStart](#)]. | [Pricing Page](#) [[#Pricing](#)]

To access the Pricing console,

1. Log in to the **Foundation** service for your **business** (URL provided by Skava).

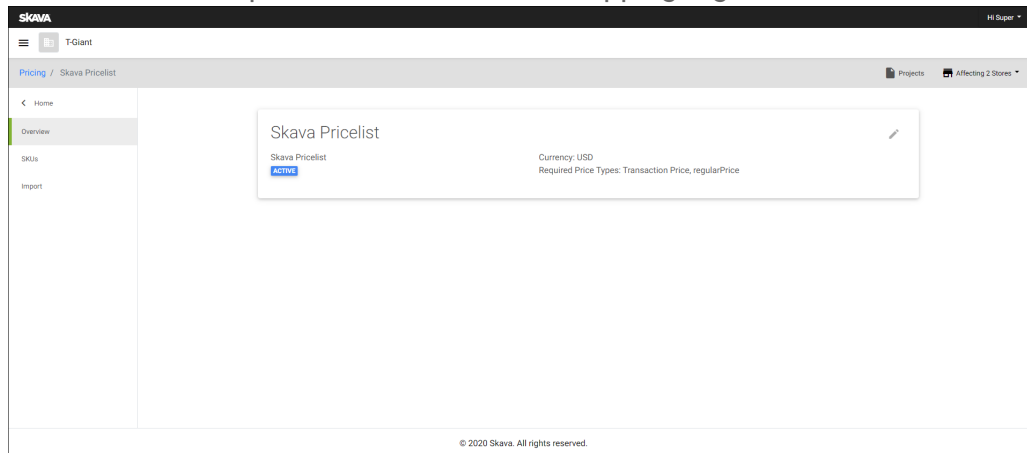

A screenshot of the Skava login page. The page has a dark header with the 'SKAVA' logo on the left and 'LANGUAGE: ENGLISH' with a dropdown arrow on the right. The main content area is white and contains a 'Sign In' section. This section includes two input fields: 'Your Email' with an envelope icon and 'Your Password' with a lock icon. Below these fields are two buttons: a blue 'Sign in' button and a blue 'Forgot Password?' link. At the bottom of the page, there is a dark footer area containing the text 'Learn more about Skava Commerce and upcoming events at Skava.com', a 'Privacy Policy' link, and a copyright notice 'Copyright 2019 Skava. All rights reserved.'

2. Click **Pricing** in the **StoreOps** page.

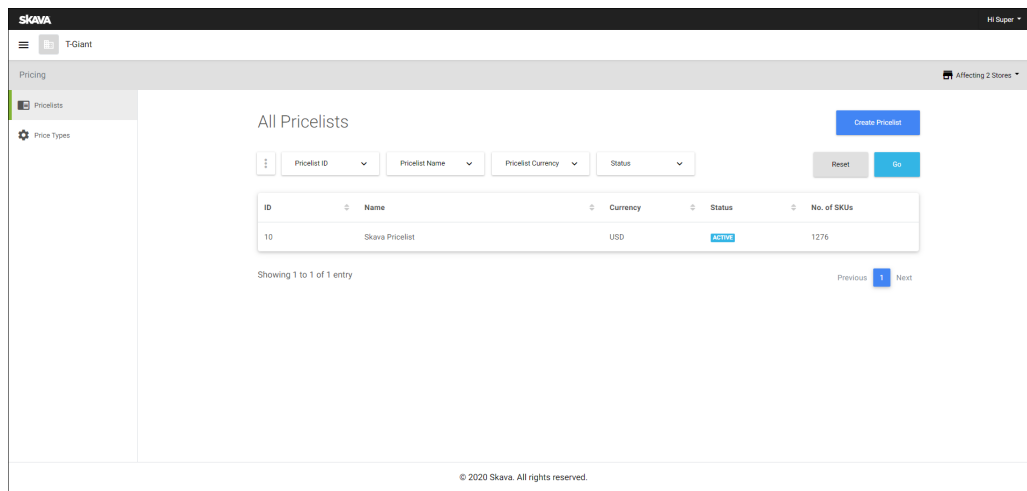

The landing page of the Pricing console can be any one of the following:

- The price list detail page appears if the Pricing collection has been associated with a price list for the default shipping region:

- The **All Pricelists** page appears if the Pricing collection has been associated with multiple shipping regions:

Note: To associate a pricing collection with a store, see [Associating a Collection with Microservice\(s\)](#).
[\[https://developer.skava.com/microservices/foundation/foundation-admin-user-guide/#Associating_a_Collection_with_Microservices\]](https://developer.skava.com/microservices/foundation/foundation-admin-user-guide/#Associating_a_Collection_with_Microservices).

□ Pricing Page

[Accessing the Pricing Console \[#Access\]](#). | [Revision History \[#RevHis\]](#)

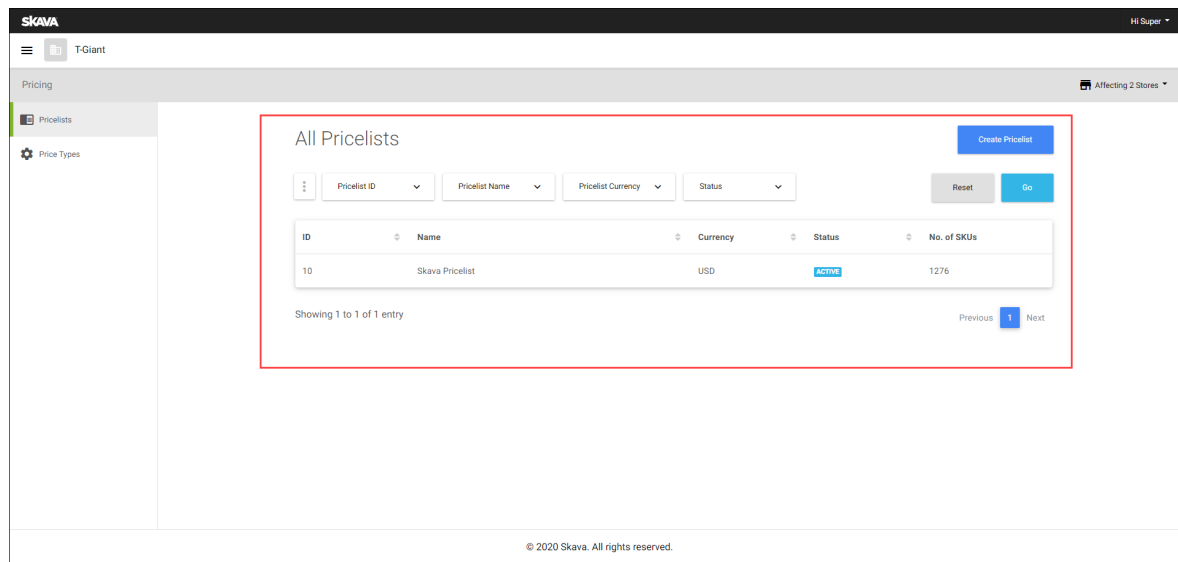

In the **Pricing** page, you can:

- [manage price lists \[#ManagePL\]](#)
- [manage price types \[#ManagePriceType\]](#)

[] Managing Price Lists

In the **All Pricelists** page, you can:

- [search for price list \[#SearchPL\]](#)
- [create a price list \[#CreatePL\]](#)
- [view and/or edit a price list \[#EditPL\]](#)
- sort the **ID**, **Name**, **Currency**, **Status**, or **No. of SKUs** by ascending/descending order

Note:

- Pagination option appears in all screens that contain the price list information.
- To navigate to the next page, click **Next**.
- By default, 10 rows per screen will be displayed.

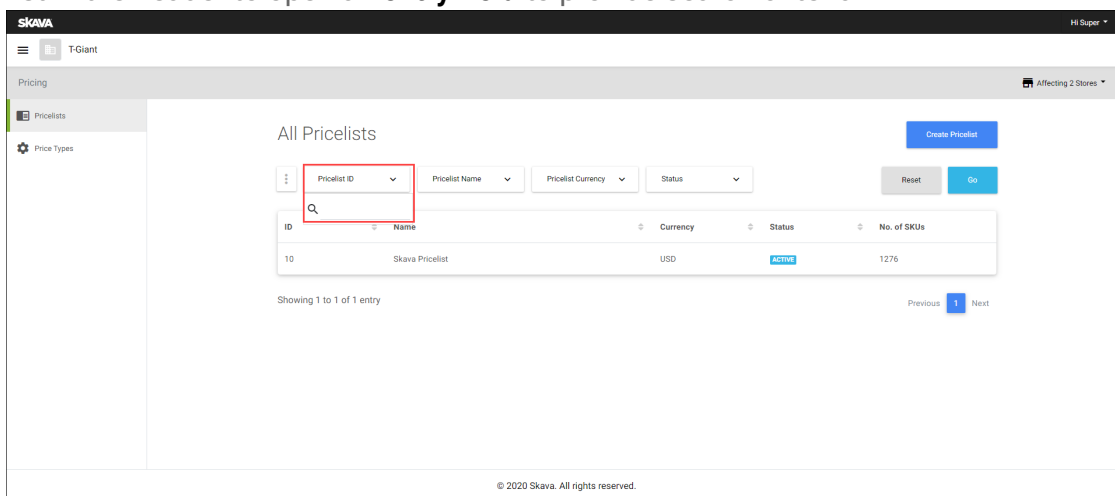

Configuring Search Parameters

In the **All Pricelists** page, you can search for the price list [#SearchPL] and modify the search fields [#ModifySearchField] as needed.

🔍 Searching for Price list

To search for price list,

1. Click the **Pricelist ID**, **Pricelist Name**, **Pricelist Currency**, and/or **Status** drop-down list in the header to open an **entry field** to provide search criteria.

2. Enter the desired search criteria in the search field, and then click the **Go** button:

The screenshot shows the 'All Pricelists' search interface. The 'Pricelist ID' dropdown is set to 'Skava' and the 'Go' button is highlighted with a red box. The table below shows the search results.

ID	Name	Currency	Status	No. of SKUs
10	Skava Pricelist	USD	ACTIVE	1276

Showing 1 to 1 of 1 entry

Note: To reset the search field in the header, click the **Reset** button.
The price list(s) that matches the search criteria appears.

□ Modifying the Searchable Fields

To modify the searchable fields,

1. Click  available at the beginning of the search field.
2. Select or deselect the items to add or remove the searchable fields in the header:

The screenshot shows the 'All Pricelists' search interface with the search dropdown menu open. The 'Row Select' option is highlighted with a red box. The table below shows the search results.

ID	Name	Currency	Status	No. of SKUs
10	Skava Pricelist	USD	ACTIVE	1276

Showing 1 to 1 of 1 entry

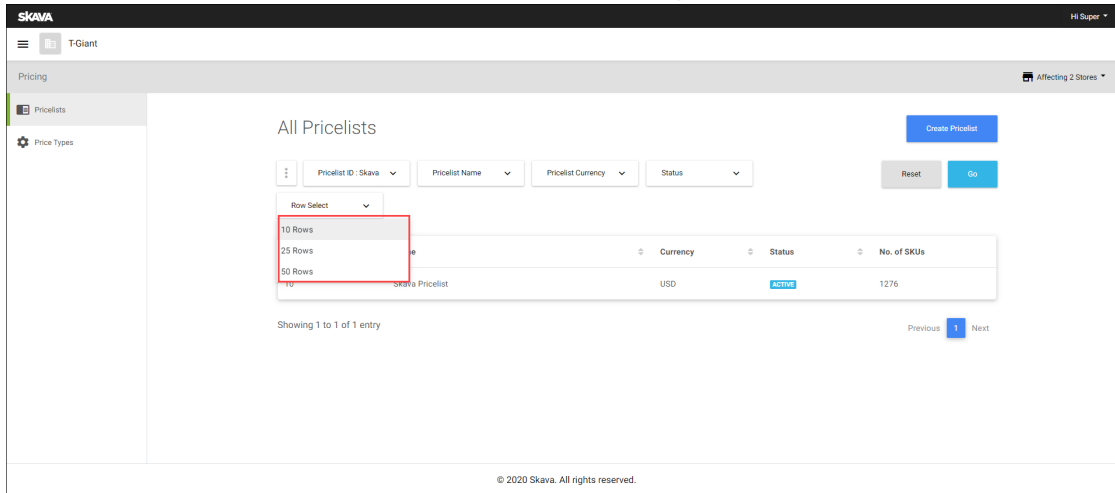

Note: To reset the search field in the header, click the **Reset** button.

□ Selecting Predefined Rows

By default, 10 customer accounts per screen will appear, but the number of customer accounts per screen can be modified as follows:

1. Click  available at the beginning of the search field, and then select **Row Select** from the Search list.
The **Row Select** appears as part of the search criteria.

2. Select **10 Rows**, **25 Rows**, or **50 Rows** from the drop-down list.

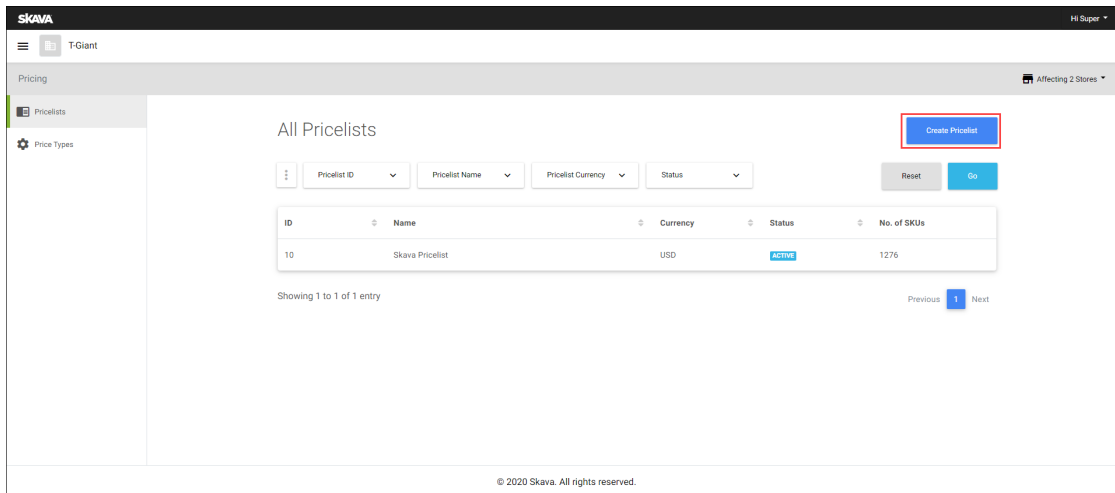

3. Click the **Go** button. The selected rows of customer accounts appear on the screen.
Note: To reset the search field in the header, click the **Reset** button.

□ Creating a Price list

To create a price list,

1. Navigate to the **All Pricelists** page.
2. Click the **Create Pricelist** button.

The **Create Pricelist** form appears:

Field	Description
Pricelist Name	Indicates the name of the price list.
Description	Enter the description of the price list.
Currency	Select the appropriate currency for the price list from the drop-down option. The currency can be configured via collection property [https://developer.skava.com/microservices/pricing/pricing-collection-properties/] . Currency cannot be altered after the price list is created.

Status	<p>Select the appropriate status for the price list from the drop-down option. The possible statuses are:</p> <ul style="list-style-type: none"> • Active – Indicates the active status of the price list. The active price list can be mapped with s SKU(s). The default status of the price list is Active. • Inactive – Indicates the inactive status of the price list. The active price list can not be mapped with s SKU(s).
Price Types	<p>The price type(s) can be made as mandatory or optional price type for the price list by enabling or disabling the toggle. Following are the price types:</p> <ul style="list-style-type: none"> • Transaction Price – The transactional price is the actual price and subscription is the amount of percentage applied on the transactional price. This is a default price type. • Subscription Price – Indicates the subscription price of a SKU. This is a default price type. • Floor Price – The floor price is the least price of a SKU. The transactional price of the SKU should not go below this price if defined. This is a default price type. • Bundle Price – Indicates the bundle price of a SKU. This is a default price type. • Price Type – Indicates the available custom price types. To add the custom price type, see Adding a Custom Price Type [#AddPriceTypes].

4. Click the **Save** button.

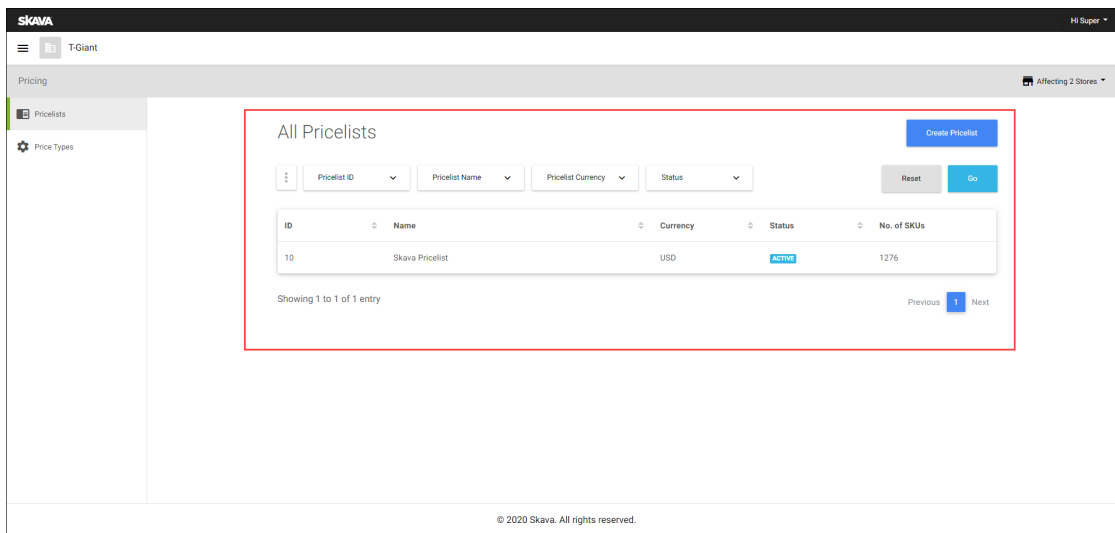

Note:

- To discard the changes, click the **Cancel** button.
- To add SKUs to the price list, see the SKUs tab.

□ Viewing and Editing a Price List

To view and/or edit a price list,

1. Navigate to the **All Pricelists** page.
The list of price lists appears:

- [export SKU\(s\) \[#ExportSKU\]](#)
- [add SKU\(s\) to a price list \[#AddSKU\]](#)
- [edit a SKU \[#EditSKU\]](#)

🔍 Search for SKU(s)

To search for SKU(s),

1. Click **SKUs** in the left navigation panel.
2. Click the **SKU ID** and/or **Transaction Price** drop-down option in the header to open an **entry field** to provide search criteria.

The screenshot shows the 'Skava Pricelist' interface. At the top, there's a header with 'Skava' and 'T.Giant'. Below it, a navigation bar shows 'Pricing / Skava Pricelist'. A sidebar on the left has links for 'Home', 'Overview', 'SKUs', and 'Import'. The main content area is titled 'Skava Pricelist' and includes a 'Currency: USD' and 'Required Price Types: Transaction Price, regularPrice'. Below this, there's a section for 'All SKUs' with a search bar and filters. The search bar has a red box around it, and the 'SKU ID' filter is also highlighted with a red box. The table below shows columns for 'SKU ID', 'Transaction Price', 'Floor Price', 'Bundle Price', 'Minimum Price', and 'Maximum Price'. The table contains 10 rows of data. At the bottom, there's a pagination bar showing 'Showing 1 to 10 of 1275 entries' and a 'Go' button.

SKU ID	Transaction Price	Floor Price	Bundle Price	Minimum Price	Maximum Price
560008140	4.5	-	-	-	-
560008150	4.5	-	-	-	-
560009110	9.99	-	-	-	-
560009120	9.99	-	-	-	-
560009130	9.99	-	-	-	-
560009140	9.99	-	-	-	-
560009150	9.99	-	-	-	-
560010110	9.99	-	-	-	-
560010120	9.99	-	-	-	-
560010130	9.99	-	-	-	-

Note:

- For displaying a predefined number of orders per screen, see [Selecting Predefined Rows \[#RowSelect\]](#).
- By default, all the approved SKUs of the price list are listed within the SKUs tab. If the project is selected, you can view the SKUs that are added via a project by selecting the particular project in the **Projects** drop-down option.

3. Enter the desired search criteria in the search field, and then click **Go**.

This screenshot is similar to the previous one, but it shows the 'SKU ID' filter set to '560009120'. The 'Go' button in the bottom right corner of the filter section is highlighted with a red box. The table below shows the same columns as before, but the data is filtered based on the selected SKU ID.

SKU ID	Transaction Price	Subscription %	Floor Price	Bundle Price	Minimum Price	Maximum Price
560008140	4.5	-	-	-	-	-
560008150	4.5	-	-	-	-	-
560009110	9.99	-	-	-	-	-
560009120	9.99	-	-	-	-	-
560009130	9.99	-	-	-	-	-
560009140	9.99	-	-	-	-	-
560009150	9.99	-	-	-	-	-
560010110	9.99	-	-	-	-	-
560010120	9.99	-	-	-	-	-
560010130	9.99	-	-	-	-	-

Note: To reset the search field in the header, click the **Reset** button.

Export SKU(s)

To export SKU(s),

1. Click **SKUs** in the left navigation panel.
2. Click the **Export** button.

The screenshot shows the Skava Pricelist interface. On the left is a navigation panel with 'SKUs' selected. The main area displays 'Skava Pricelist' with a status 'ACTIVE' and currency 'USD'. Below this is a table titled 'All SKUs' with columns: SKU ID, Transaction Price, Subscription %, Floor Price, Bundle Price, Minimum Price, and Maximum Price. The table contains 10 rows of data. Above the table are filters for Project (All Approved), SKU ID, and Transaction Price. To the right of the filters are buttons for 'Export' (highlighted with a red box), 'Add SKU', 'Reset', and 'Go'. At the bottom, it says 'Showing 1 to 10 of 1275 entries' and has pagination controls.

SKU ID	Transaction Price	Subscription %	Floor Price	Bundle Price	Minimum Price	Maximum Price
560008140	4.5	-	-	-	-	-
560008150	4.5	-	-	-	-	-
560009110	9.99	-	-	-	-	-
560009120	9.99	-	-	-	-	-
560009130	9.99	-	-	-	-	-
560009140	9.99	-	-	-	-	-
560009150	9.99	-	-	-	-	-
560010110	9.99	-	-	-	-	-
560010120	9.99	-	-	-	-	-
560010130	9.99	-	-	-	-	-

The SKUs details with their price are downloaded to your local system.

Adding a SKU to Price List

To add a SKU to price list,

1. Click **SKUs** in the left navigation panel.

2. Click the **Add SKU** button.

- Add a price list to the SKU as follows:

- Click the Add button.

The screenshot shows the Skava Pricing Admin interface. At the top, there's a header with 'SKAVA' and 'T-Giant'. Below it, a breadcrumb trail shows 'Pricing / Skava Pricelist / 560008150'. On the left, there's a sidebar with 'SKUs' and 'PRICES'. The main content area shows 'SKU ID: 560008150', 'Skava Pricelist (10)', and 'Currency: USD'. Below this, there's a 'Prices' section with a table. The table has columns: 'Transaction Price', 'regularPrice', 'Floor Price', 'Bundle Price', 'Min. Qty', 'Max. Qty', 'Subscription %', 'Status', and 'Scheduled Dates'. The first row shows values: 4.5, 7.5, 4.5, -, -, -, 1, 'ACTIVE', and '16 Aug 2018 00'. Below the table, there's a 'Showing 1 to 2 of 2 entries' message and 'Previous' and 'Next' buttons. A red box highlights the 'Add' button in the top right corner of the 'Prices' section.

The **Select Project** pop-up opens if the project is not selected:

The screenshot shows the 'Select Project' pop-up modal. It has a title bar with 'Select Project' and a close button. Below the title bar, there's a search bar with a magnifying glass icon and the text 'Search'. To the right of the search bar, there's a dropdown menu with 'Open' selected and a 'View All' link. Below the search bar, there's a list of projects. The first project is 'Skava Store' with an 'OPEN' button and a 'Details' button. Below the list, there's a 'New Project Name*' input field and a 'Create Project' button.

- Select or create a project.

The screenshot shows the 'Select Project' pop-up modal. It has a title bar with 'Select Project' and a close button. Below the title bar, there's a search bar with a magnifying glass icon and the text 'Search'. To the right of the search bar, there's a dropdown menu with 'Open' selected and a 'View All' link. Below the search bar, there's a list of projects. The first project is 'Skava Store' with an 'OPEN' button and a 'Details' button. Below the list, there's a 'New Project Name*' input field and a 'Create Project' button. Red boxes highlight the 'Skava Store' project and the 'Create Project' button.

The **Add Price** modal opens:

The screenshot shows the 'Add Price' modal. It has a title bar with 'Add Price' and a close button. Below the title bar, there's a large empty space. At the bottom, there's a 'Transaction Price*' input field.

Import History

In the **Import History** section, the import history is maintained for all import of price details under the **Import** tab.

The following table describes the column details of the **Import History** section:

Column	Description
Imported file	View the imported file and download it to your local computer by clicking the Imported File link.

Project ID	View a project ID, through which the import of price details is done.
Date (UTC)	Timestamp of import.
User ID	Identification of a logged-in user.
Status	Import status of price details. The possible statuses are, SUCCESS, PARTIAL, and FAILED.
	View import summary of a particular imported price detail by clicking this icon.
	Download and view the failed items with the reason for the failure of import.

Managing Price Types

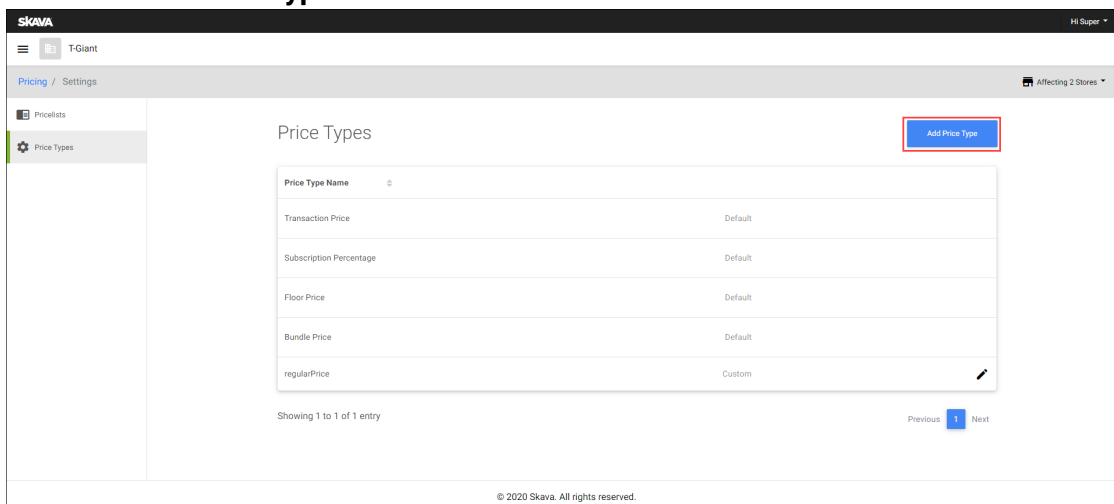

Store **Price Types** and **Currencies** are managed via settings of the Price Types. The price types are default price types and custom price types. The default price types can not be editable and the custom price types can be added and edited. In the **Price Types** landing page, you can:

- [add a custom price types \[#AddPriceTypes\]](#)
- [edit a custom price types \[#EditPriceType\]](#)

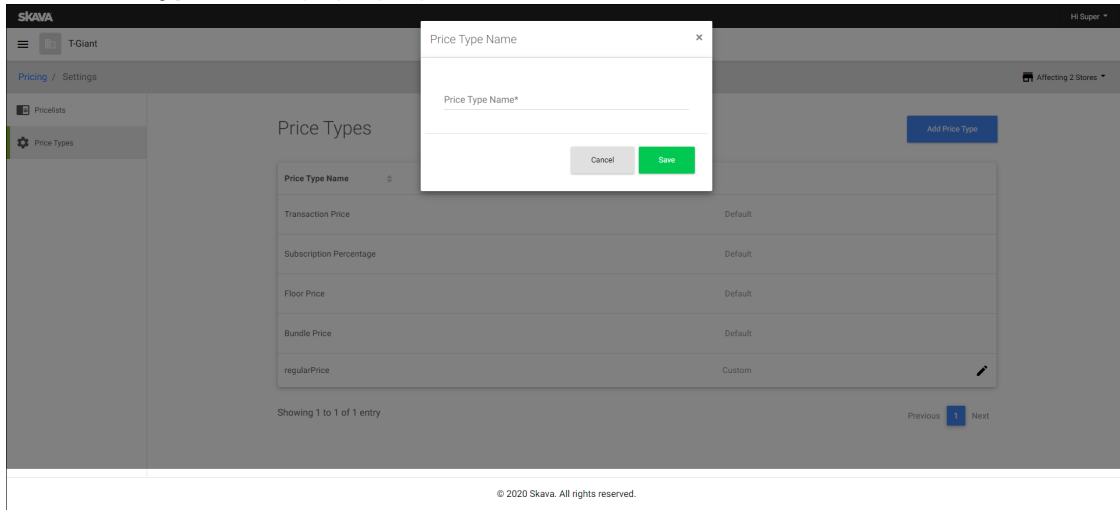

Adding a Custom Price Type

To add a price type,

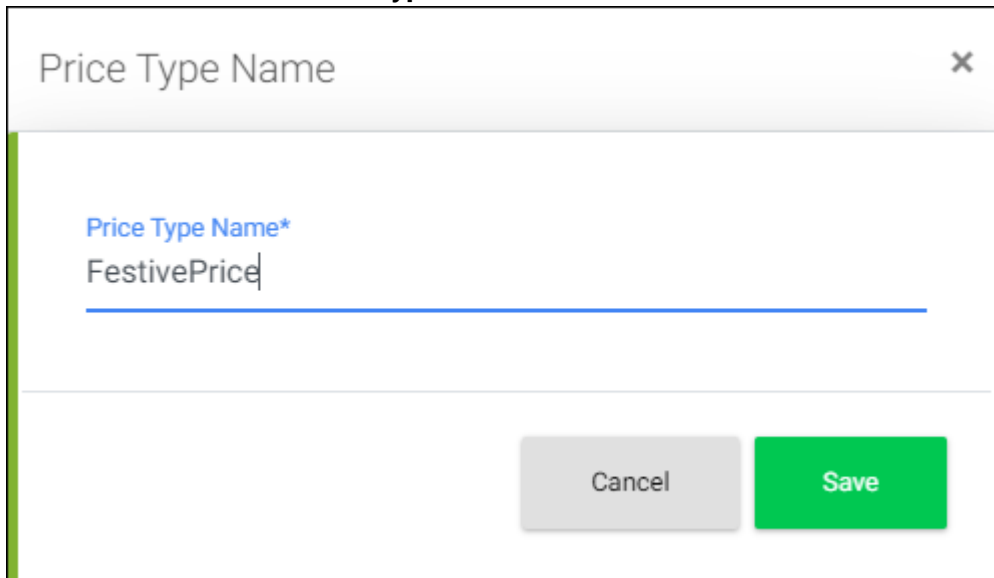

1. Click **Price Types** in the left navigation panel.
2. Click the **Add Price Type** button.

The **Price Type Name** pop-up opens:

3. Enter the name in the **Price Type Name** field.

4. Click the **Save** button.

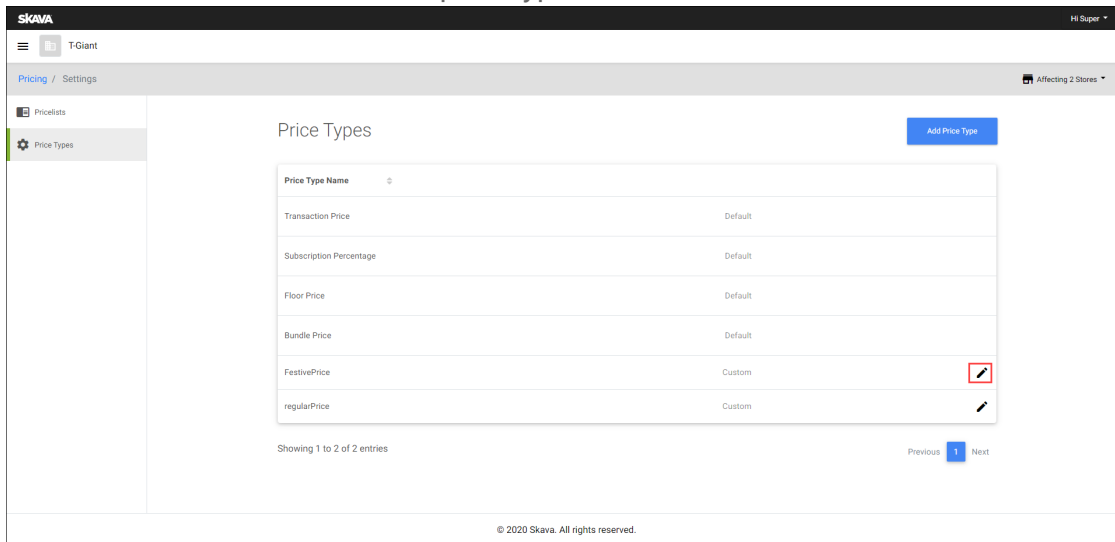

Note: To discard the changes, click the **Cancel** button.

¶ Editing a Custom Price Type

To edit a custom price type,

1. Click **Price Types** in the left navigation panel.

2. Click the edit icon of the desired price type.

The **Price Type Name** pop-up opens:

The pop-up form is titled 'Price Type Name' and has a close button (X) in the top right corner. It contains a text input field with the label 'Price Type Name*' and the value 'FestivePrice'. At the bottom, there are two buttons: 'Cancel' (grey) and 'Save' (green).

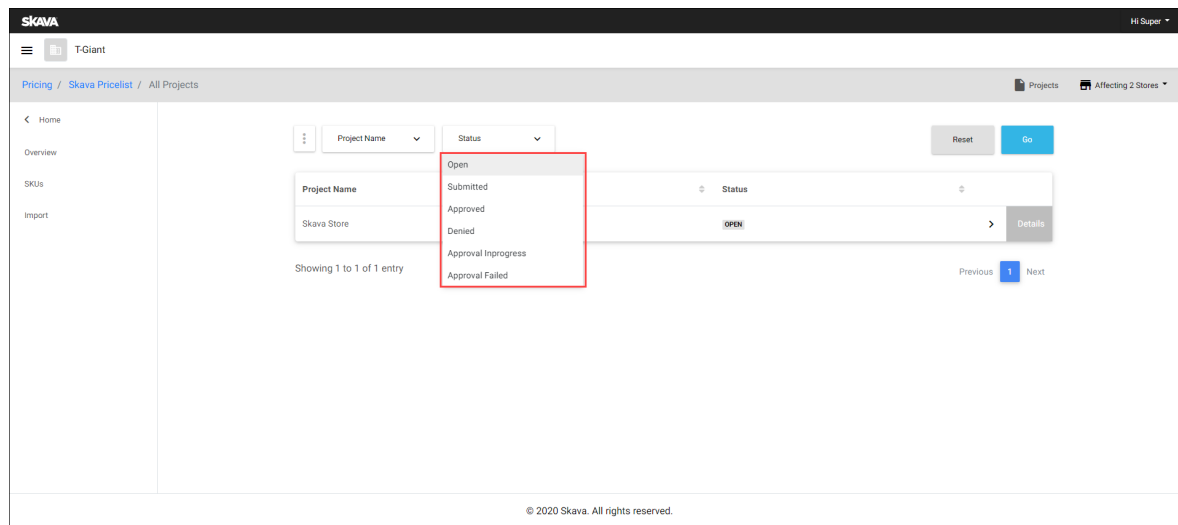

3. Update the name in the **Price Type Name** field.

4. Click the **Save** button.

Note: To discard the changes, click the **Cancel** button.

Project Workflow

The project workflow is the process of managing price list details via the project. In the project workflow, you can create or select a project to add the addition/update of price list details to the project or initiate the addition/update of price list details, a project select pop-up opens to select or create a project to make part of the price list details in the project. The project workflow is managed via a feed process and controlled by various statuses.

The possible project statuses are:

Status	Definition
Open	the default status upon project creation or if the project has been reopened by the Pricing Admin for correction. At this status, the details within the project can be edited.
Submitted	changes submitted to Pricing Admin for approval.
Approved	changes approved by Pricing Admin, the approved price list details are live.
Approval Inprogress	changes approved by Pricing Admin and the approval feed is in progress.
Approval Failed	changes approved by Pricing Admin and the approval feed is failed. Note: The Approve button will be available in the UI to approve the project again by the Pricing Admin to trigger a new approval feed.
Denied	changes rejected by Pricing Admin and the project cannot be opened or submitted further.

In the project workflow, you can:

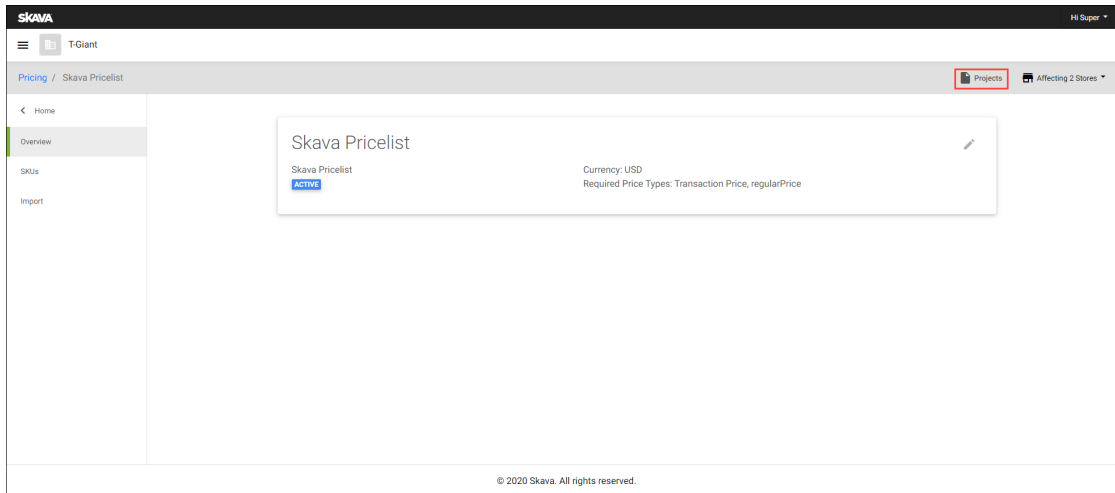

- [create a project to wrap new and/or update of price list details](#) [#CreateProject]
- [view and/or edit project details and price list details](#) [#EditProject]
- [submit a project with price list details](#) [#ProjectSubmit]
- [approve, deny, or reopen the submitted project](#) [#ApproveProject]

□ Creating a Project

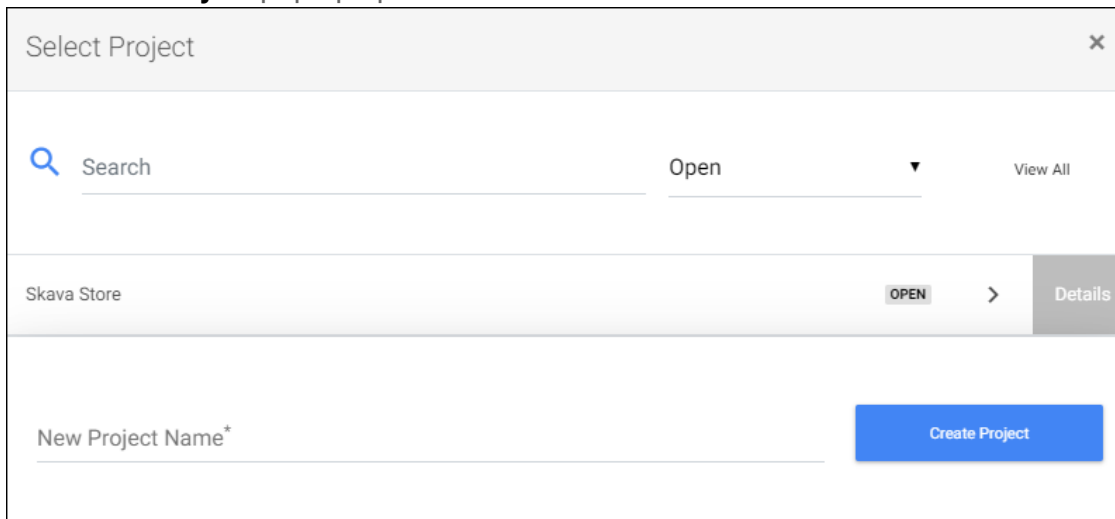

A project can be created to wrap new and/or update of price list details.

To create a project,

1. Click the **Projects** at the top right-hand side of the browser window of the Pricing header.

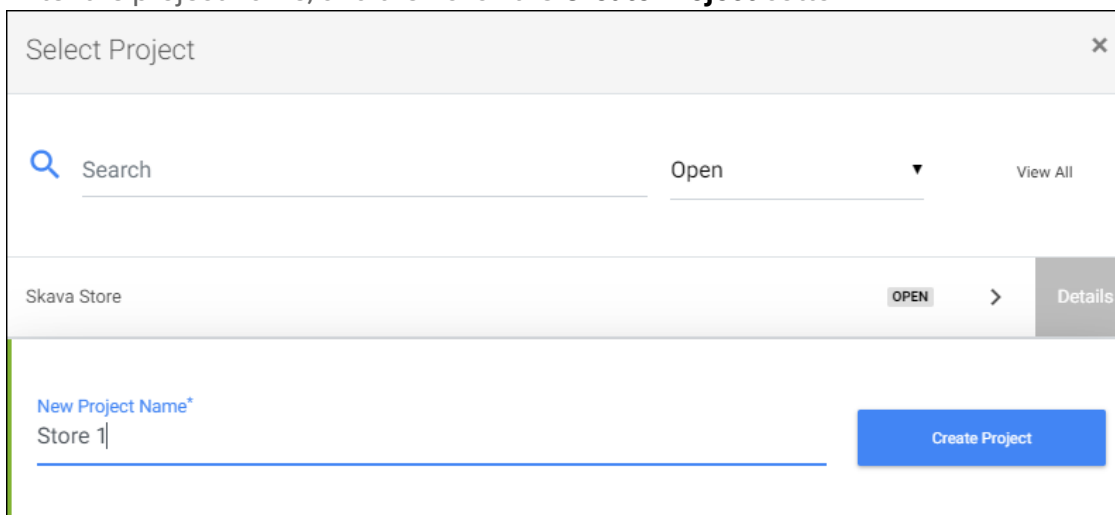

The **Select Project** pop-up opens:

Note: Alternatively, the **Select Project** pop-up opens while adding or updating price list details.

2. Enter the project name, and then click the **Create Project** button.

3. The project is created with OPEN status:

Note:

- The project name must be unique from all other existing project names regardless of the project status.
- To view and/or edit the project details, see Viewing and/or Editing Project Details.

□ Viewing, Editing Project Details

To view and/or edit project details,

1. Click the **Projects** at the top upper-right side of the browser window of the Pricing header.

The **Select Project** pop-up opens:
