

Headless eCommerce

A sneak peek into the future

Samuel Snopko from Storyblok will embed the CMSs' matters in the whole landscape, explaining how to take advantage of headless technologies to build an eCommerce solution with Nuxt, Vue Storefront, commercetools, and Storyblok.

Samuel Snopko

Head of DevRel @storyblok
FrontEnd Knight & DesignOps & Speaker & Community believer
Vue.js & Nuxt.js Advocate

Monolithic vs Decoupled

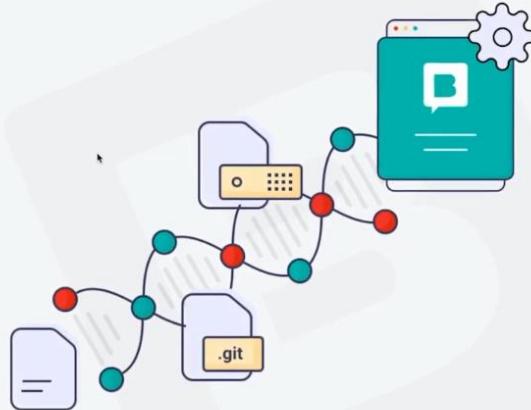

Decoupled Frontend & Backend
DX & UX are the first class citizens
Lower cost and higher modularity

Evolution of CMS

What makes a CMS a CMS?

Non-dev Features like

- Content Authoring / Scheduling / Pipeline
- Internationalization / Modularity
- Preview / Real-time editing
- Focus on content & content editors

Why headless eCommerce?

- Reusability
- Delegation of tasks
- Security
- Performance
- Editing non-eCommerce content
- Focus on what matter

Technology stack

- Nuxt
- Vue Storefront
- Storyblok
- Commercetools

Storyblok Nuxt Hub

Storyblok is the headless CMS for managing the content of your website/application, creating different stages, roles, and integrate with commerce systems.

Screenshot of the Storyblok app interface showing the 'Welcome' screen. The sidebar on the left lists various demo spaces. The main area features a central illustration of a person sitting at a desk with a laptop, surrounded by icons representing different actions. A prominent green button labeled 'Create new space' is visible.

Screenshot of the 'Create new space' screen. The sidebar remains the same. The main area shows four options: 'Create a new space' (selected), 'Duplicate a space', 'Play with a demo', and 'Join a space'. Below these options, there's a form to 'Create a new space' with fields for 'Name' and 'Organization'. A large green button labeled 'Create space' is at the bottom.

Screenshot of the 'Create new space' screen, identical to the previous one but with a slight change in the 'Name' field. The 'Name' field now contains the word 'DEMO' instead of being empty. The rest of the interface, including the sidebar and the 'Create space' button, remains the same.

The screenshot shows the Storyblok dashboard with a sidebar containing navigation links like Back to spaces, Demo, Dashboard, Content, Tags, Assets, Components, Datasources, Apps, and Settings. The main area displays a 'Next step' guide with three sections: 'Create a demo page' (with a note about Home entry), 'Create your first folder' (with a note about folder set-up), and 'Create your first entry' (with a note about defining fields). Below the guide is a table listing a single item: 'Home' (Page, Content type, Last update: 2021-04-13 16:10, Author: [user icon]).

A new empty space is created for you to work in.

This screenshot is identical to the one above, showing the 'Next step' guide and the same table listing the 'Home' entry.

The screenshot shows the 'Components' page in the Storyblok dashboard. The sidebar is the same as the previous screens. The main area lists four components: 'feature', 'grid', 'page', and 'teaser'. Each component has a 'Name' (checkbox), 'Is content type' (checkbox checked), 'Nestable' (checkbox checked), and 'Last update' (date: 2021-04-13 16:10).

Name	Is content type	Nestable	Last update
feature	✓	✓	2021-04-13 16:10
grid	✓	✓	2021-04-13 16:10
page			2021-04-13 16:10
teaser	✓	✓	2021-04-13 16:10

The Components page is where you will be creating all your components needed for your website contents.

The screenshot shows the 'Content' page in the Storyblok dashboard. The sidebar is the same as the previous screens. The main area lists the single 'Home' entry from the previous screens.

The Content page is where you will see all the already created content you have and their data schemas.

The screenshot shows the Storyblok CMS interface. On the left is a sidebar with navigation links: Back to spaces, Dashboard, Content (selected), Tags, Assets, Components, Datasources, Apps, and Settings. The main area has a search bar at the top. Below it is a table with columns: Name, Content type, Last update, and Author. Two items are listed: 'Connected Home' (Page, last updated 2021-04-13 14:03 by user 'Hello world') and 'Home' (Page, last updated 2023-02-08 21:15 by user 'Hello world').

We can easily create the data content for a Vue Storefront website like below

The screenshot shows a Vue Storefront website. The header includes a 'Help & FAQs' link, a search bar, and navigation for WOMEN and MEN. The main content features a large image of a woman in a floral dress. Text on the left says 'SUMMER COLLECTION 2019' and 'Colorful summer dresses are already in store'. A green 'LEARN MORE' button is visible. The right side shows a 'Content' editor panel for a 'Page' with a 'Body' section containing a 'Teaser' block with the text 'Hello world'.

The screenshot shows a Vue Storefront website. The top features a grid of four product cards for 'Cream Beach Bag' priced at \$50.00 each, each with a 5-star rating. Below this is a dark callout box with the text 'Subscribe to Newsletters' and 'Be aware of upcoming sales and events. Receive gifts and special offers!', accompanied by a 'SUBSCRIBE' button. To the right is a 'Content' editor panel for a 'Page' with a 'Body' section containing a 'Teaser' block with the text 'Hello world'.

The screenshot shows the Commercetools dashboard with the 'Products' section selected. A search bar at the top right contains the query 'sb-vs1'. Below it is a table with columns: Product name, Product type, Product key, Status, Created on, and Modified on. The table lists four items:

	Product name	Product type	Product key	Status	Created on	Modified on
<input type="checkbox"/>	Cotton Sweater	Bag	cw	Published	04/13/2021 2:00 PM	04/13/2021 2:00 PM
<input type="checkbox"/>	Cream Beach Bag	Bag	cream-beach-bag	Published	04/13/2021 1:13 PM	04/13/2021 1:18 PM
<input type="checkbox"/>	Bag	Bag	Bag	Published	04/13/2021 1:58 PM	04/13/2021 1:59 PM
<input type="checkbox"/>	Sweater	Bag	Sweater	Published	04/13/2021 2:06 PM	04/13/2021 2:06 PM

At the bottom left, a dropdown menu shows '20 Items per page (4 items)'. At the bottom right, there are navigation controls: '< Page 1 of 1 >'.

We have also created a space in **Commercetools** with 4 new **products** in 2 **categories** that we want to sell on our **storefront**.

The screenshot shows the 'Developer settings' page with the 'API clients' tab selected. It displays three API clients:

Name	Last used	Date created
VSF Access All	04/13/2021 (0 days ago)	04/13/2021 (0 days ago)
VSF Access	-----	04/13/2021 (0 days ago)
Products & Categories	04/13/2021 (0 days ago)	04/13/2021 (0 days ago)

At the bottom left, a dropdown menu shows '20 Items per page (3 items)'. At the bottom right, there are navigation controls: '< Page 1 of 1 >'.

This is the Developer Settings page where we can grant access for the Products and Categories data to Storyblok and access to the Vue Storefront to load the data.

The screenshot shows the Storyblok content editor for a page titled 'SUMMER COLLECTION 2019'. The page features a large image of a person's legs wearing sandals. Below the image is the text 'SUMMER COLLECTION 2019' and 'Colorful summer dresses are already in store'. A green 'LEARN MORE' button is located at the bottom of this section. On the right side, there is a sidebar with tabs for 'Content', 'Status', 'Config', and 'Tools'. Under 'Content', there is a 'Page' section with a 'Body' field containing a rich text editor with a toolbar. The toolbar includes options like 'Select all', 'Teaser', 'Hello world!', 'Grid', and 'Add block'.

The screenshot shows the Storyblok CMS interface. On the left is a sidebar with navigation links: Dashboard, Content, Tags, Assets, Components, Datasources, Apps, and Settings. The main area displays a table of content items. The first item is 'Connected Home' (Content type: SF Page, Last update: 2021-04-13 14:58, Author: [Profile Picture]). The second item is 'Home' (Content type: Page, Last update: 2021-02-08 21:18, Author: [Profile Picture]). There is also a 'Search' bar at the top.

The screenshot shows a developer's terminal interface with several panes. The left pane is the Explorer, showing the project structure including .nuxt, cms, components, composables, helpers, lang, layouts, middleware, node_modules, pages, plugins, static, .babelrc, .editorconfig, .gitignore, jest.config.js, nuxt.config.js, package.json, README.md, shims-webpack.d.ts, tsconfig.json, yarn-error.log, and yarn.lock. The center pane is the TERMINAL, showing the command-line interface for building the project. The output shows the project is being prepared for development, the builder initialized, and files generated. It then shows the client and server being compiled successfully. The right pane is the Node.js terminal, showing the project is listening on port 3000. The bottom status bar indicates the terminal is using Zen mode, with 28 spaces, UTF-8 encoding, JSON selected, ESLint, and Prettier.

We can use the Vue Storefront to create a new project from scratch, you need the **storefront-ui/vue**, **commercetools**, **storyblok-nuxt** and other libraries added to the project as above.

STOREFRONT UI

The first Vue.js UI library dedicated to eCommerce

Create stunning, mobile-first online stores with this 100% customizable design system

[READ THE DOCS](#) [GO TO GITHUB](#)

Made with **Vue.js**
Open-Source solution
Free to use

#4 Product of the Day

STOREFRONT UI

Press "I" to search...

- Introduction
- How to use Storybook

StorefrontUI - Customization-first component library

Welcome to our storybook! You can use it to browse and play with StorefrontUI components. On the left panel, you will find every component that is currently available in the library. You can play with props and CSS modifiers of each component from **Knobs** menu.

Components marked as **WIP** will likely be changed, hence it's not safe to use them.

StorefrontUI is currently in BETA which means it is not suitable for production! The package is stable but some breaking changes may occur.

Join us!

StorefrontUI is a completely new approach for component libraries. It is oriented around customization possibilities instead of out of the box possibilities. It's a great goal but it will take a lot of time to achieve it only by ourselves. The project is open source and free to use. If you'd like to support us and join the team, please write to me: [flip \[at\] vuestorefront.io](#) ❤️

How to start?

1. Add the package:

```
npm install --save storefront-ui@vue
```

 or

```
yarn add storefront-ui@vue
```
2. Import stylesheets in your main.js or the root component of your application:

```
import './storefront-ui/vue/styles.css';
```
3. It's done! Now you can import and use any of the components:

```
import { SFComponentsName } from './storefront-ui/vue'
```
4. You can find detailed information about every component inside each component's story

How to customize?

StorefrontUI components can be customized in many ways:

- Global customization through SCSS variables.
- Standard component customization with filling the props.
- Replacement of default HTML with slots.
- Heavy customization with usage of HTML, CSS and JS partials.

You can find detailed information in [this doc](#).

The screenshot shows the VS Code interface with the following details:

- Explorer View:** Shows the project structure under `STORYBLOK-VUESTOREFRONT`. The `ConnectedHome.vue` file is selected.
- Code Editor:** Displays the `ConnectedHome.vue` component code. The code uses Nuxt.js and Storyblok integration. It includes template sections for different components based on story content, a script block with data and mounted lifecycle hooks, and an event listener for the `$storybridge`.
- Bottom Status Bar:** Shows file paths like `STRBLK - Demo Vue Storefront`, zoom level `Zoom: 100%`, column selection `Col 8 (56 selected)`, and various UI settings.

      }
    }
  }
</script>

```

The screenshot shows a Vue.js-based storefront application with a dark header bar. The header includes tabs for 'Present: A sneak peek into the future' (active), 'Vue.js based and customization-fu', 'VSF Commercetools Demo - B' (active), 'Merchant Center', and 'storyblok-vuestorefront'. Below the header, a navigation bar has items like 'Connected Home' (active), 'Connected Home', 'Not Secure | app.storyblok.com', and a search bar with placeholder 'Search...'. A green success message box is visible in the top right corner: 'Item published successfully!'. The main content area displays a product grid with four items: 'Cream Beach Bag' (50.00 \$, 5 stars), 'Cream Beach Bag' (50.00 \$, 5 stars), 'Cream Beach Bag' (50.00 \$, 5 stars), and 'Cream Beach Bag' (50.00 \$, 5 stars). Below the grid is a dark call-to-action section with the title 'Newsletter' and a 'Subscribe' button. On the right side, there's a sidebar titled 'Content' with sections for 'SF Call To Action' (with a 'Define schema' button), 'SF Page > SF Call To Action' (with 'Copy' and 'Title' fields set to 'Newsletter'), and 'Description' (with the text 'Subscribe to our newsletter').
